

What is Wickr IO?

An **integration gateway** that enables end-to-end secure, API-based integration with the Wickr platform

Use Cases

- Chat bots
- Integration with 3rd party services

Technical Overview

- Build your own integrations as simple JavaScript or HTTP client/server applications
- Support custom interaction with the IO client (data input/output)
- Code in any language
- Limitless potential

Specifications

- Ubuntu Linux client with API interface
- Self-managed
- Self-hosted

Support Frameworks

- Hubot – Hundreds of open-source 3rd party integrations
